## Stack Frames

### Person.java

```
private int maximumBooks;

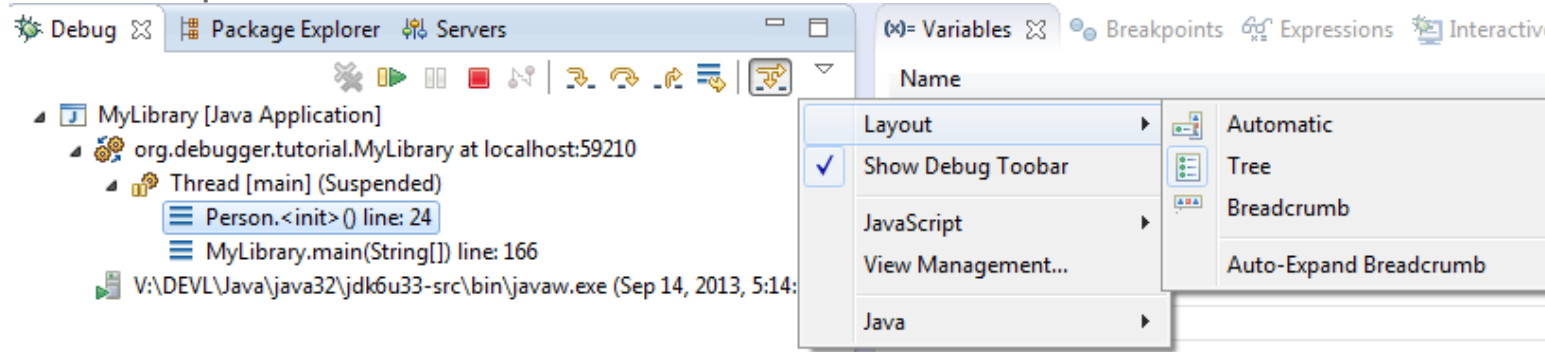

public Person() {
    name = "unknown name";
}
```

```

    maximumBooks = 3;
}

```

## Run to Breakpoint

## StepOut of current Frame

## Value of Jim

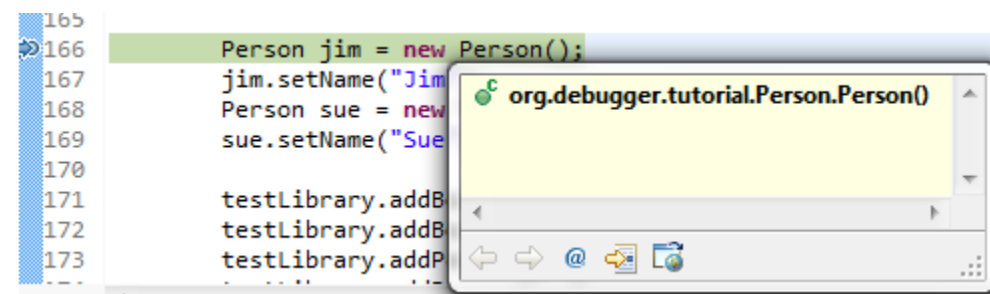

```

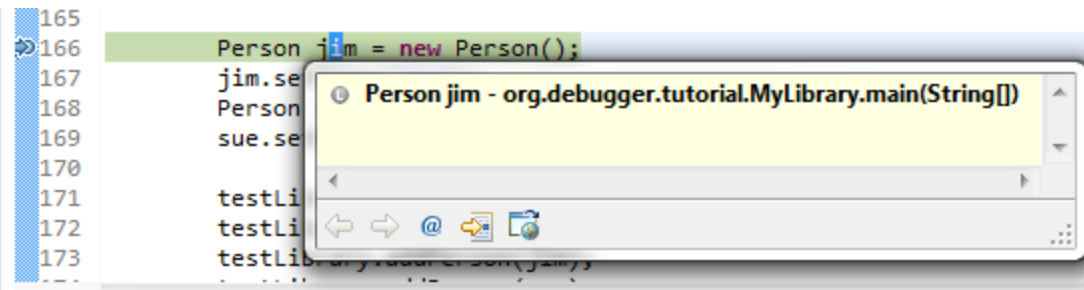

163     b2.setAuthor("Charles Dicker");
164
165
166     Person jim = new Person();
167     jim.setName("Jim");
168     Person sue = new Person();

```

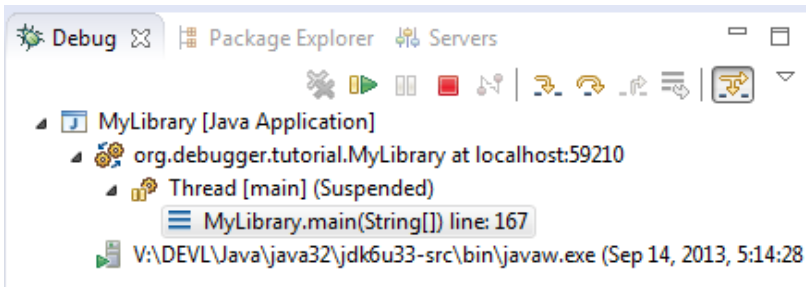

## No Jim

Name	Value
args	String[0] (id=17)
testLibrary	MyLibrary (id=20)
b1	Book (id=21)
b2	Book (id=23)

```
165
166 Person jim = new Person();
167 jim.setName("Jim");
168 Person sue = new Person();
169 sue.setName("Sue");
```
