Linux Mint 16 Installation & Configuration
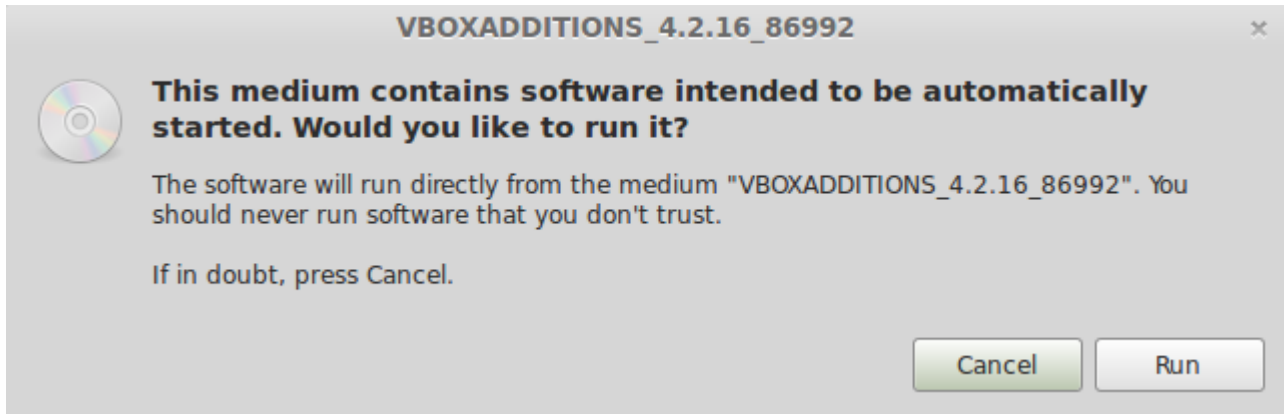

Configuration

Once Installation Completes, if VM, install VBox Guest Additions

Install updates

Error on Update
- Upon Error run this command in terminal to manually clean it up
- sudo dpkg --configure -a
- Run Install Updates now

4 broken packages, use filter to locate them
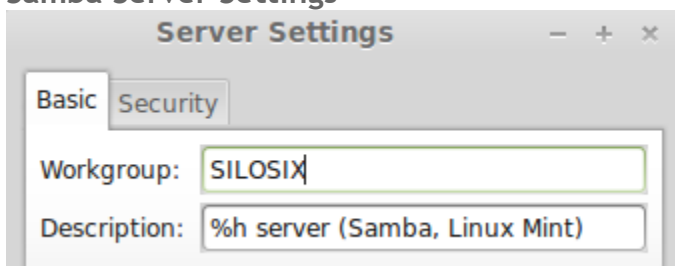

Samba for Networking
system-config-samba

system-config-samba
Gui for managing samba shares and users

samba
Smb/cifs file, print, and login server for unix
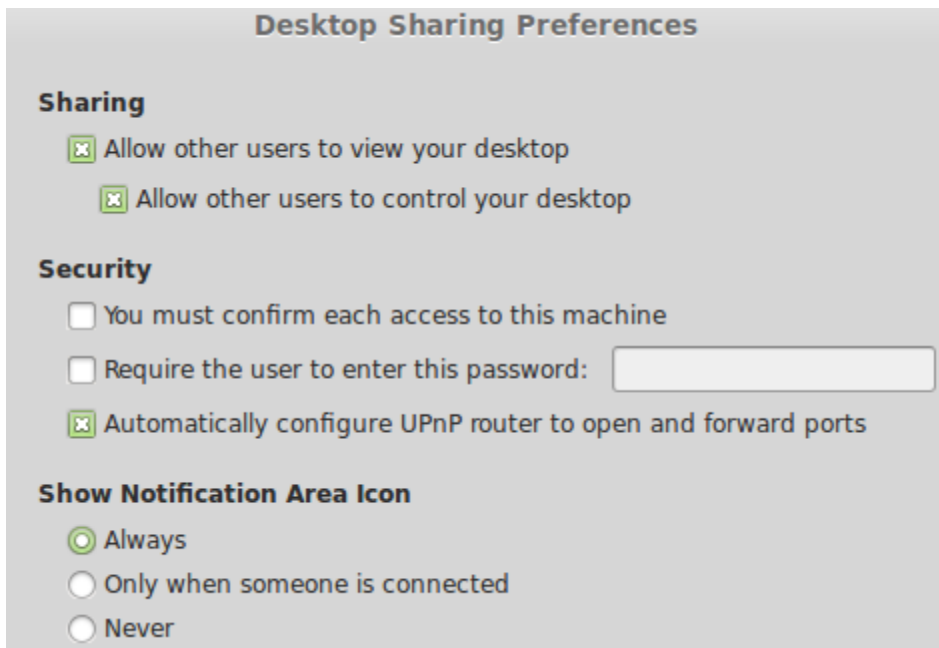

Samba Server Settings

Users and Groups
- silosix-admin [silosix setup remote
- silosix-users [muneca
- silosix-guest [guest
- silosix-minors [minor

Remote Desktop Enable
- vino-preferences
- vino-server
- uses port 5900
- netstat -nl | grep 5900

Desktop Sharing Preferences

Sharing
- ☒ Allow other users to view your desktop
- ☒ Allow other users to control your desktop

Security
- ☐ You must confirm each access to this machine
- ☐ Require the user to enter this password: [   ]
- ☒ Automatically configure UPnP router to open and forward ports

Show Notification Area Icon
- ⦿ Always
- ○ Only when someone is connected
- ○ Never

Personal File Sharing
- May run into missing packages issue, so just go a folder such as 'Public' and select 'Sharing Options', and share the folder. Looking to force the OS to initialize the sharing components.

Folder Sharing

Folder Sharing

☒ Share this folder

Share name: `Public`

Comment: `VMLint16 Public Folder`

☒ Allow others to create and delete files in this folder

☒ Guest access (for people without a user account)

Cancel   Create Share

Nemo needs to add some permissions to your folder "Public" in order to share it

The folder "Public" needs the following extra permissions for sharing to work:
 - write permission by others
Do you want Nemo to add these permissions to the folder automatically?

Cancel   Add the permissions automatically
